PROFESSIONAL OVERVIEW

I am a dedicated and enthusiastic student eager to start my professional journey in web development. While I have limited formal work experience, my passion, creativity, and strong commitment to learning make me a promising candidate for this position. I thrive on solving challenges, am highly motivated to grow, and am excited to contribute innovative solutions in the field of web development.

WORK EXPERIENCE

Web Developer / Intern

School Management System, Mawarid Tech Academy January- June 2025

The **School Management System** is a web-based application designed to streamline academic and administrative operations in a school. It allows users to manage student records, academic sessions, class schedules, attendance, and user roles with clear permissions.

- Developed and maintained core modules including **student admission, class & section management, attendance tracking, accounting feature, and class routines** using Laravel, MySQL, JavaScript, and Bootstrap.
- Implemented **role-based access control** (Admin, Receptionist, Teacher, Student) to ensure secure and organized system usage across different users.
- Built dynamic dashboards and reports displaying **real-time data** (e.g., total students teacher classes, attendance status, class materials), improving data visibility and decision-making.

Setec Institute (Final Project)

CMS Website for Gaming Products, SETEC Institute June-2024

A web-based Content Management System (CMS) designed to allow administrators to manage and customize gaming product content dynamically, improving user experience and content delivery.

- Developed a full-stack CMS using **Laravel, PHP, MySQL, JavaScript, and Bootstrap**, enabling real-time content updates without code changes.
- Built and implemented **CRUD functionalities** for managing gaming products, categories, banners, and website content.
- Designed a responsive and user-friendly interface, improving usability across desktop and mobile devices.
- Optimized database queries and structured data handling, ensuring **fast performance and efficient content management**.
- Integrated dynamic frontend components to display gaming products and updates instantly on the website
